```
int main() {
. . .
double x,y;
x = 5;
                    void switch_1(double a,
\overline{\text{switch}}_1(x,y);
                           double b) {
                       double c=b;
                       b=a;
                       a=c;
```
